2014 marks the 14th year of the Senior Leadership Program (SLP). More than 700 senior NIH employees have participated in this incredible learning experience. The program has been highly praised by both senior scientists and administrators for its relevant content, experiential learning activities and exceptional faculty. The program focuses on leadership competencies that are essential to the achievement of NIH’s scientific goals. Twenty-eight managers will have an opportunity to participate in each of the upcoming programs and work with a select group of peers and scholar-practitioners.

LEADERSHIP FOR SCIENTIFIC ACHIEVEMENT

Over the last 10 years I’ve participated in a number of leadership programs, but none came close in quality and value as this one. The program brought in the nation’s most outstanding teachers and coaches, people with extraordinary enthusiasm and expertise in the unique challenges and opportunities for NIH Senior Leaders. The units on personality traits, feedback, negotiation, group dynamics, situational leadership, and results-based accountability gave me new high-level skills and insights that I put to practical use within days. We received a great deal of individual attention, with plenty of opportunities to address our own personal queries and concerns to outstanding faculty who are well-versed in the NIH culture.

Dr. Michael S Lauer
Director, Division of Cardiovascular Sciences
National Heart, Lung, and Blood Institute

An engaging, rewarding experience! The NIH Senior Leadership Program provided me with powerful insights and practical tools for leading and managing extramural scientific programs at NIH.

Dr. James P. Kiley,
Director, Division of Lung Diseases
National Heart, Lung, and Blood Institute
The NIH Senior Leadership Program provides senior NIH scientific and administrative leaders with the opportunity, working with a select group of peers and scholar-practitioners, to:

- assess individual leadership skills and attributes with data and multiple feedback opportunities, including one-on-one sessions with executive coaches
- design and implement a personal leadership development plan
- enhance capacity to lead for scientific results at NIH, including the ability to use data efficiently to drive organizational decision making
- assess and address the organizational capacities of one’s IC
- develop a systematic approach to negotiation and cross-organizational ventures at NIH
- think analytically about challenges and strategies for leading organizational change at NIH
- enhance capacity to analyze and operate effectively in the political systems that impact NIH

Leadership competencies addressed in the Senior Leadership Program correspond with all five SES Executive Core Qualifications: Leading Change, Leading People, Results Driven, Building Coalitions/Communications, and Business Acumen.

The program also complements the NIH Leadership and Management competency model as well as the NIH Executive Proficiencies model.

Format

The NIH Senior Leadership Program combines case studies, interactive discussions, experiential learning, assessment data, development planning and a three-day intensive opening session. The curriculum includes sessions led by renowned scholar-practitioners and leaders, as well as one-on-one feedback sessions conducted by feedback experts. A lead instructor/facilitator provides continuity throughout the program.

Registration
